Summary

Full-stack developer (MERN) and 2026 B.Tech graduate with internship experience at an early-stage startup, building features on Cloudflare Workers, D1, and R2. Seeking Software Engineer, SDE-1, or Associate Software Engineer roles.

Technical Skills

Languages: C++, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Redux, Tailwind CSS, Vite, Motion (Framer Motion), EJS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Passport.js, Session Management, MVC Architecture

Databases & Storage: MongoDB, MySQL, SQLite (Cloudflare D1), Cloudflare R2, Cloudinary

Cloud & Tools: Cloudflare Workers, Gmail API, Claude Code, Git, GitHub, Hoppscotch, Render, Vercel

Concepts: Data Structures & Algorithms, OOP, DBMS, SDLC, Unit & Regression Testing, Debugging, Web Security

Experience

Primrose Sphere Tech Pvt. Ltd. Remote
Full Stack Developer Intern *Jun 2026 – Sep 2026*

- Designed and shipped features for a serverless goal-tracking app on Cloudflare Workers, D1, and R2, working closely with the tech lead and using AI-assisted development (Claude Code).
- Built incremental Gmail sync that imports only new emails since the last sync, saving email details in D1 and full emails in R2.
- Found and fixed a bug where the sync silently skipped older emails, and added a test so it can't happen again.
- Added file attachments with direct uploads to R2, with file details saved in D1.

IBM SkillsBuild Remote
Frontend Web Developer Trainee *Jun 2024 – Aug 2024*

- Built **Agency-AI**, a responsive agency website with React.js, Vite, Tailwind CSS, and Motion scroll animations, including a dark/light theme toggle; deployed on Vercel.

Projects

WanderLust – Travel Listing Web App | *Node.js, Express.js, MongoDB, EJS* | GitHub | Live *Dec 2025*

- Built a full-stack travel listing platform (MVC) with 10+ RESTful CRUD routes and Cloudinary image uploads.
- Implemented authentication and authorization with Passport.js and sessions, blocking all write operations for unauthenticated users.

AI Thumbnail Generator – AI-Powered Web App | *React.js, Node.js, Express.js, MongoDB* *Sep 2025*

- Built a full-stack MERN app that generates custom thumbnails from text prompts via an external AI API, with 5+ REST endpoints for prompt submission, generation, retrieval, and deletion.
- Stored generated-image metadata and prompt history in MongoDB so users can view and manage past generations, with structured error handling and correct HTTP status codes.

Education

University School of Information, Communication & Technology (USICT, GGSIPU) Delhi, India
B.Tech in Electronics & Communication Engineering *Nov 2022 – May 2026*
CGPA: 7.33 / 10

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Achievements

DSA & Problem Solving: Solved 300+ problems on LeetCode in C++.

Leadership: Head of the Training & Placement Cell at USICT (2023–24); coordinated with 10+ recruiters and led placement readiness drives for 200+ students.
